

TPS 21 in 21 – Guidelines for Participants

This special bonus challenge for 2021 invites TPS members to compile a 21-image panel of images for final presentation at a Club Event in January 2022.

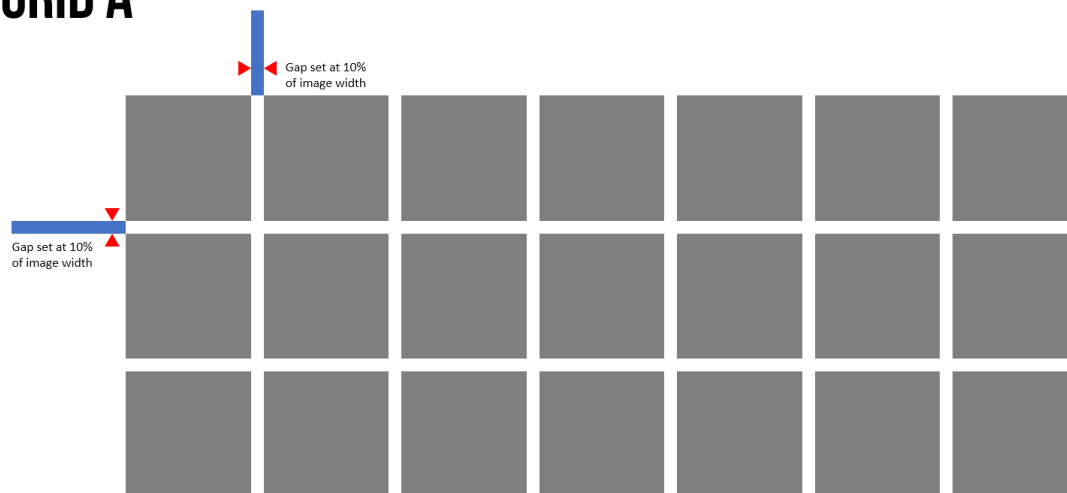

All 21 images must be taken on a different day during 2021 and have been shared in the TPS365, TPS52, and/or TPS12 Flickr Groups as part of the daily, weekly, or monthly challenges of 2021.

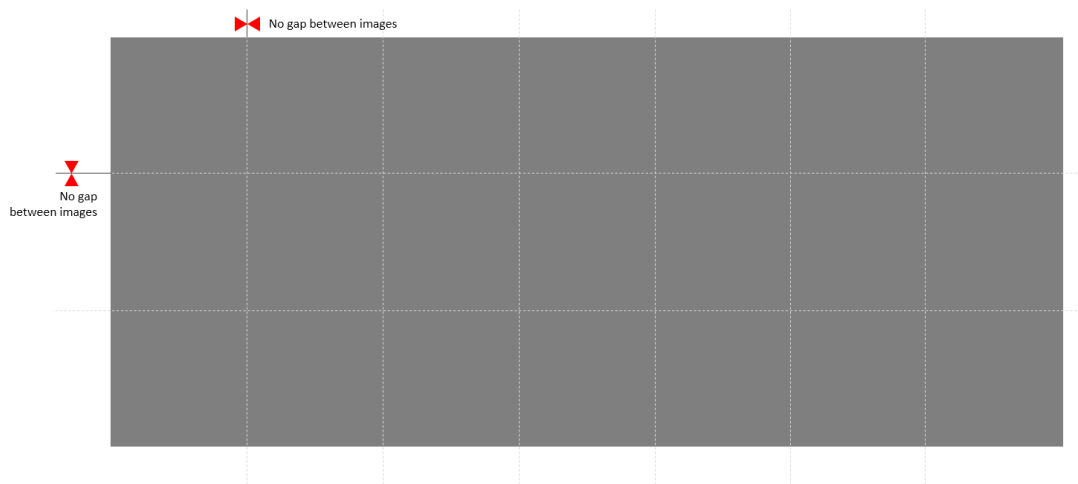

Images in the panel must be presented in square format (1:1 ratio) and can be a cropped section of a larger original image of the same or a different ratio. Additional image treatment is allowed when compiling your panel, for example, converting all images to monochrome or applying a consistent visual treatment like adding a border.

The grid must comprise three rows of seven images. There are two grid options available, Grid A is out 'Spaced Grid' where the images are separated by a 10% image width gap and Grid B is our "Tight Grid" where there is no gap between the images. Participants can choose the grid option that best suits their images and preference.

GRID A

GRID B

This is a fun, optional challenge to help TPS members create a truly unique record of their year. We recommend using this as an opportunity to express what is important in your life and show your photographic journey through the year. We welcome submissions of every kind; just be true to yourself and have fun.
